Preface

This document is a full transcription of the *Proceedings of the Adventures* for the period March 1640 to February 1651. The original document is held by the Cambridgeshire Archives in Ely (Reference: KBLC/2/1/4).

The entries are ordered by date and paragraph number for each date. Where possible the original spelling has been retained except in a few cases where the meaning of the word would be hard to distinguish by a modern reader. Modern punctuation has, however, been added to make the text more readable (commas and full stops).

27/12/50 2 Upon reading of a letter from Mr Hamond of the 22nd of December instant, it is ordered that an answer thereto bee sent unto him from the treasurer as followeth viz -

- That as touching that of Waldersea, they believe that Palmers survey is in the right, they desire to bee enformed whether Kingscrots surveye takes in the comon as well as the severall without makinge any distinction thereof, and as for paying the £500 to Mr Fyennes the case stands that if Palmers survey bee right there wants 98 acres of what by the contracte wee ought to have which at 55s per acre comes to £269.10.00 which taken out of £1010.06.00 there will remayne but £740.10.00 and the remediation after 27 yeares of a 3rd part thereof is to bee paid to Mr Rows besides the rest referred thereupon, and Mr Burrell allready hath received £330 so that there will remayne but £410 in their handes to satisfye Mr Rows with and Mr Fyennes too and therefore it will bee impossible to pay Mr Fyennes £500. The Companie will perfect the bargain if they will goe on with Palmers survey and will pay the mony but that shall be due thereupon
- For the agreement for the land of my Lord of Westmorland, they desire Mr Hamond to take care that my Lord bee not paid for that land which the Adventurers are to have out of his which is owed to my Lord St John.

- 3 Whereas the Company, upon information out of the Countrey that the dam made at the Horseshoe below Wisbech River was turned through the new cutt and was by Mr Hamonds directions cutt up and the water suffered to passe through the sluice which did very much ease the water above and helpe the speedie passage to the sea and that notwithstanding Sir Cornelius Vermuyden had given order to make up againe that dam, the Companie did, by an order of the 20th December last, order that the nyne persons or any five of them appointed by an order of the 10th January to manage the workes of dreyninge [Page 78] and whose order and directions in and about the dreyninge by the Articles of Agreement made betweene the Companie and Sir Cornelius Vermuyden, and the said Sir Cornelius Vermuyden is to observe and bee subjecte to, should consider of the said dam and of the information certified about it and to give some order therein, the said persons accordingly, takeinge the same into consideration, doe find that the reason why the said dam was at first cutt was because the said new dreyne is not made eyther to its full depth or breadth, neyther does it bare any proportion eyther to the river above or below it, whereby it must needes bee a greate choake and stoppage to the water in the tyme of floodes and in the dryest tyme of winter keepe up the river higher then otherwise it would bee and thereby makes all the charge layd out by the Companie fruitles and in vaine, and they are sufficiently satisfyed that the said cutt cannot bee made perfecte this winter without excessive charge to the Companie and that the openninge the said dam whereby the water may run through the said sluice is the best meanes to supply that defecte that that dam, being as they are enformed of late made up againe, bee fothwith cutt againe to the best depth it can and so to continue all this winter

Mr Burton is desired to see this order out in execution

- 4 Ordered that this precedent order bee sent enclosed letter to Sir Cornlelius Vermuyden which letter followeith in his verbis

By direction of the Companie, wee have tooke into consideration the new cutt you have made by the Horse Shoe at Wisbech through which is put all the water that heretofore did goe through the sluice and the sluice damed up, and upon information that the new cutt by reason of some clay beddes is not yet perfected to their breadth and depth which it ought by your owne designe to bee brought unto, wee thereby apprehended it to be a great stopp to the water and of michievous consequence in tymes of great floodes are therefore untill that cutt can bee fully perfected, which wee believe cannot bee this winter, wee conceive the openninge the sluice for the water to have his course through, but aswell as by the new cutt would be the best meanes to supply that imperfection and hereof there hath byn already some experience, and therefore have ordered that (as you will see by the enclosed which wee doubt not you will observe) that the dam, whereby the water is turned out of his course through the sluice, bee taken up to the best depth it can. And we have done this not onely because of the danger in the tyme of floodes but because wee know it extremely much concerninge to the service of the Companie in procuringe theire judgement which will bee had upon a view that the river bee allwaies kept very lowe such it can now bee when there is such a drain as these clay hills makes allways lying in the widest thereof. We hartily comende

ourselves unto you, rest.

According to an order of refference of the 23rd of December instant wee have examyned the matter of facte touchinge the case of the 3600 acres in the first lott and wee finde abouts and unto Robert Henley Esqr for materialls sold by warrant from Francis late Earle of Bedford and others £620.19.00 or thereabouts, and in recitinge his tithe to the 11th lott, late Sir Fillibert Vernatts conveyed the same to the now Earle of Bedford, Edward Russell Esqr, Robert Henley and Robert Castell Esqr and theire heirs, to the intent that they should sell the premisses or any part for the best value they could gett, and with the money raised by sale, pay such persons to whome it shall appeare to bee due by any warrant under the hand of Sir Cornelius Vermuyden or any other lawfully authorized there unto, and by the enrollment of the deede will more fully appeare but the originall wee have not seene it, remayninge with Mr Smith your clarke (as wee are enformed), but wee find there passed no more by this conveyance from Mr Latch but 3600 acres, In regard, 400 acres were sold away by Sir Filibert Vernatt before Mr Latch his tithe, and the purchasors of the 400 acres stand upon the tax roll and wee finde there is due for taxes for the 3600 acres for the 9 taxes payable in August last £2025, upon this matter of facte Mr Latch and wee all agree that the taxes are fitt to bee paid to the Companie and Mr Latch doth not deny the £630.19.00 is payable to Mr Henley for the materialls but doth incist to bee charged to the workemen for no other workes but such as were done before the 23rd of December 1641 when, as hee alledged others were appointed to take care of the workes, now in regard the certainty of the tyme of Mr Latches discharge from or leaving of his office of expendorshippe did not appeare, wee propounded to Mr Latch that he would procure a purchasor who should lay downe the taxes and the Companie should make a conveyance of the 3600 acres to such purchasor who should hold the same lyable onely to the payment of such monyes as are in justice and equite payable by Mr Latch by the copie of a privie seale that the 15th of September 1639, Mr Latch was appointed receivour of severall somes of money for the workes of dreyninge and to bee expendor. And wee finde that in February 1641 hee had a warrant under the late Kings hand to goe beyond seas and from the 23rd of December 1641, as hee saith, neyther hee of his duputies medled **[Page 79]** in that busines, now also finde that after his retorne from beyond sea viz - the 23rd December 1647 by a writing indented under his hand and seale which is recited that the said Mr Latch stood indebted (as was alledged) unto diverse workemen and others for and concerninge the late workes of dreyninge the Great Levell; £4500.11.10 or thereabouts, wyther to the workemen or for the materialls or workes done which Mr Latch thought reasonable but thought hee should bee strictured in point of tyme, so that wee must leave it wholly to the Companie what they thinke fitt to doe in the busines

- 30/12/50 2 Upon readinge of the report touching the state of the case of 3600 acres in the first lott and, upon hearinge of Mr Latch touchinge the same, in regard that Mr Latch doth freely offer that, in case hee shall not by **[Page 80]** the ende of March next pay the taxes due, or to bee due before that tyme or by that tyme procure one or more purchasors for the said 3600 acres, who shall likewise pay the said taxes and take the said 3600 acres by conveyance from 5 or more of the Companie, lyable onely to the payment of such moneyes as are in justice and equity payable by Mr Latch, eyther to the workemen or for the materialls or workes done, accordinge to the said report and to future taxes, that hee will relinquish all his clayme to the said 3600 acres and joyne in an assurance as the Companie shall thinke fitt, and in regard his case is of much concernment to the Companie for obteyninge of satisfaction for the materialls due to the Companie and procuringe payment of the monyes due to the workemen, which would bee left if the said 3600 acres should not bee sold onely for non payment of taxes, doe therefore thinke fitt and order upon the desire and consent of Mr Latch, as aforesaid, that hee have respitt untill the last day of March next for payment of the taxes and procuringe such purchasor or purchasors as aforesaid and doe further order by, and with the like consent of the said Mr Latch, that in case the said taxes bee not paid or such purchasor or purchasors procured by the tyme aforesaid, the said Mr Latch doe relinquish all his clayme to the same and joyne in assurance as the Companie shall thinke fitt but this order is not to be brought in precedent to stop the sale of any other landes for non payment of taxes
- Memorand: Mr Thurloe onely dissented to this order

- 03/01/51 2 Upon readinge a letter from Sir Cornelius Vermuyden of the 27th December last it is ordered that the treasurers retorne an answer there unto as followeth
- Sir I have received yours of the 27 of December last and communicated the same to the Companie who are very glad to heare the levell is in a condition fitt for an adjudication but with all I am desired by them to enforme you what is lately enformed them viz - first that the water lyes high in the fennes upon the Southea Bancke and unles it bee sodainly removed they have cause to feare it will hinder the adjudication, and for the next place that those on the north side of Wisbich complayne that the sluice sett in Wisbich marsh is sett too high so that the water contynues so high still in those marshes that they feare that they shall loose the next somers profitt, which will cause some clamour on us though the fault bee their owne, but will certainly make them backward in contributinge their proportion to that worke accordinge to their

agreement. And the preventing any danger or inconvenience by the former particulars and amending the defect of the former sluice in setting the other lower, if there bee cause and furtherance of all other the workes (which are many), I am, in the name of the Companie, to make it their earnest desire that you would bee present in person upon the workes to see how they goe forward above Bedford River and the rest of [Page 81] the workes, and that by your owne view you might bee able to satisfie the Commissioners at the adjudication and to be daylie observed of all accidents which they conceive will tend much to the good of the Companie for the future. They will sodainly take into consideration your propositions for the plantinge beds with osyer willowes and sallowes, and touching the opening the dam at the sluice, the Companie in generall is not fitt to determyn anythinge now or heretofore therein but left it and doe still leave it to five or more of the nyne who are intrusted according to your articles for regulatunge the workes to whome they wish you would in that perticular wholly apply yourselfe, and this beinge att the place I rest

You humble servant Robert

- 03/01/51 3 Upon reading of another letter from Mr Hamond of the 28th December last, it is ordered that the treasurer retorne an answer thereunto to this effecte

That the Companie are glad to heare their workes and in so good condition, fitt for an adjudication, and that they have lately received a letter from Sir Cornelius Vermuyden, part thereof touching removing of howses, they referre to you to doe therein as you see cause for the good of the Companie

That a petition was read out unto the Companie from Mr Burrell and Mr Morsell. A copie thereof was sent unto Mr Hamond with direction accordinge to the order following

Upon the petition of Mr Lancelott Burrell and Mr Morsell this day read to the Companie, it is ordered that Mr Hamond bee desired to examyn the truth of the said petition, and on the behalfe of the Companie, make choice of one gent to joyne with another to bee named by the petitioners, and upon that place examyn what damages hath byn this yeare susteyned by the soake of the bancke and whether it bee like to bee a contynuinge damage or how the same may bee redrest and what benefitt redowndes to them of Waldersey by discharginge of banckes from the necessity of repayre, and Mr Hamond is desired to make retorne to the Companie how hee findes the same so that the petitioners may bee put to noe further trouble

which letter was sent accordingly

- 10/01/51 1 Sir Thomas Thyme, Sir Edward Partherich, Robert Henley Snr Esqr, John Latch Esqr, Mr Andrew Henley, Mr Thurloe, Colonell Valentine Walton, Colonell Alexander Blake, Mr Baldwyn Arthur

- 10/01/51 2 Instructions to bee observed by Mr Jessop for taking the accoumpts of the expeditor and all others who have received any of the Companies money that are any waies accoumptants to them in the Countreye

The accoumpt will consist of the particulars

1 Is for spade worke, that is to say money expended for making banckes, rivers, dreynes, sluice pitts, dams and the like and that was gone eyther by the pole at a certaine rate of by daies worke

2 The sluice workes and overtoes

3 Materialls of all sorts used in the workes as wheelbarrows, plankes tymber

[Page 82] 4 Sallaries to severall persons

5 Landes bought for the use of the Companie for receptacles and other uses

- 10/01/51 3 The rules to be observed in takinge the accounts for thinges comprised in the 1st head are as followeth, and first for that which is lett by the pole
- 1 It will bee fitt toe begin in the account with those workes in order as they were sett out by the principall overseer Mr Burton and so to order it that one workes may not bee confounded with another but bee kept apart to the ende the Companie may thereby understand what every perticular worke costs
- And in taking the accoumpts in that order
- 1 The clarke comptroller is to give unto the auditor a note of the directions that Sir Cornelius Vermuyden gave for that worke which they first begin upon and so of the rest as they come in order
- 2 Then Burton, the chief overseer, is to give a copie of his contracte for such worke which is to conteyne the proportion the worke was to bee made of, which is to bee in pursuance of Sir Cornlius Vermuydens directions, and the rates it was to bee lett at. Hee is likewise to give in the names of such persons as were appointed under overseers to see the same performed according to the contracts and likewise theire certificates which they were to deliver to the said Burton upon finishing the said worke which certificates of the under overseers are to conteyne the measure of every worke both how many pole in length the worke is, and whether the proportion according to the contracte were performed to the workemen
- 10/01/51 4 The auditor, havinge the particulars aforesaid, will be enabled to examyn the expendor Lieutenantt Colonell Underwoods accoumpts as to the particulars aforesaid which accoumpt must be perticular, setting forth how many poles every worke conteyned what proportion every worke was to bee of and the rates, and to make good his accoumpt, hee must produce the duplicate of Burtons contracte, the certificate of the under overseers and the acquittances of the partie that received the money
- 10/01/51 5 The auditor, hee is likewise to compare how the certificates and contracts delivered in by Burton and the under overseer agree with the entryes in the clarke comptrollors booke and likewise with Palmer the under surveyours certificate who is to certifie the measure of every worke, both for the proportions and number of poles, and if Palmer hath byn short in doing that hee is hereby ordered to measure the same on exactly that the auditor may have his retorne before hee finish the audit
- 1 For the workes done with the spade by the daie, there beinge noe rules made in it, the auditor is to take the best care hee can that the Companie have no wrong in it. Burton was to lett out all such workes and will bee able to give the best satisfaction in it.
- 2 For the 2nd head which is sluices and overtoes, there hath byn noe rule given about it. Burton hath *de facto* lett out the same to be done at the great by Christianne Direckson. The contracts made by Burton are to bee seene and examyned with the directions of Sir Cornelius Vermuyden, given for the same, whether the contracte doe

agree therewith, and then the auditor to take such course as hee can to satisfie himselfe whether those contracts have byn performed and to distinguish, upon the expnditors accoumpts, the severall overtow and sluces that it may appeare what the change of every one pertains.

[Page 83] 3 The third head is materialls which Burton was to provide and hee must give an account, perticularly what tymber, wheelebarrows, planks were bought, as, for example, how many foote of tymber and at what rate, how many 100 or 1000 wheele barrowes and at what rate, how many planckes of what sizes and the rate, and the persons of whome they were bought, and in the buyinge in of those, for the quallity and quantity hee was to bee guided by the direction of Sir Cornelius Vermuyden, surveyour generall and expnditor or any two of them. And the expnditor is to pay for the accordinge, to such rates and prizes as should bee certified to him by the said Burton and Palmer, which certificates and acquittances from the person that received the money. The said expnditor is to procure as his warrant for payment of the same, and the certificate is likewise to bee entered in the clarke comptrollers booke and must bee compared with that which the expnditor produceth for his warrant. Burton is likewise to give an account severally to whome and by what warrant they were delivered out, that so there may bee an exacte account taken in whose handes and under whose care the said materialls are now.

4 The 4th head is sallaries

The persons to receive sallaries

- 1 The expnditor himselfe Lieutenantt Colonell Francis Underwood
- 2 The principall overseer Burton
- 3 The under surveyour Palmer
- 4 The clarke comptroller Lake or Tench
- 5 The under overseers

The expnditor himselfe is to bee allowed for himselfe and clarkes £300 per annum for the 2nd March 1649

The principall overseers £100 per annum paid to begin from the 28th March 1650

The undersurveyours 80 marks per annum from the 28th of March 1650

The clarke comptrollor £80 per annum from the tyme hee began his employment in the Country and for so long as hee was employed

For the under overseers they were to bee appointed and named by the director, surveyour generall and expnditor, and the sallary of each of them so appointed and named is 20s shillings per weeke during their employment

For the expnditors sallary, it is to be allowed him and for the clarke comptroller and Palmers, there are noe lymittations on eyther of them, but their acquittances produced by the expnditor is sufficient warrant for paying them their sallaries, onely the auditor is to take notice of the faylier of eyther of them in their duty and certifie the same to the Companie, but for the principall overseer and the under overseers the expnditor hath noe warrant to pay them their sallaries untill Palmer hath certified him that the workes (under their respective cares) bee done according to the direction of the said Sir Cornelius Vermuyden, and the certificate and the acquittance of the partie that receives the money is a good warrant to the expnditor to paie, as every one that receives any sallary, as an overseer, had such authority and was so named and

appointed as aforesaid.

5 The 5th head is for landes bought for the use of the Companie. For that the contracte is to bee made by Burton and [Page 84] and confirmed by any two of the persons named in the instructions made at Wisbech, under theire handes, and sealed, which the expendor is to produce upon his account, as also the acquittance of the parties that received the money. It must appeare to the auditor how much the landes of whome it was bought, for what estate and where it lyes, and the auditor is to state the whole accoumpt of landes taken to the use of the Companie, since the Acte of Parliament for the workes on the north side of Bedford River, whether the same bee yet paid for or not, distinguishinge those that are paid from those that are not paid for and hee is likewise to enforme himselfe what conveyance is made to the Companie of any of the landes which are allready paid for.

The instructions made at Wisbech of 28th of March 1650 are to be delivered to the auditor to the ende hee may thereby informe himselfe further for the stating the said accoumpts

- | | | |
|----------|----|---|
| 10/01/51 | 6 | And if the expendor hath paid any other somes of money not cominge within the instructions of Wisbich northside, now given to the auditor, hee must for his warrant place the order of the Companie, authorising him to paie such some and the acquittance of the parties that received it. |
| 10/01/51 | 7 | If anythinge falleth upon the accoumpt that comes not within any of these instructions, the auditor, not withstandinge, to take it as it is offered to him, and represent it to the Companie |
| 10/01/51 | 8 | Whereas Mr Jessop having complied with the desires of the Companie to goe downe to Wisbich to state theire accoumpts there, they doe hereby appointe and authorize the said Mr Jessop to call before him all and every person whatsoever which have received any some or somes of money of the Companie, or by theire appointment, or are any way accoumptable unto them, and to state and audite theire severall accoumpts accordinge to such instructions as the Companie have given unto the said Mr Jessop for the purpose.
